DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 47-53 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The applicant attempted to amend claim 47 to conform with 35 U.S.C. 101. The proper form of the preamble of claim 47 should be as follows:

A computer program product for providing an on-line group buying sale to a referring website, the computer program product comprising a computer-readable medium encoded with computer program code for causing a computer component to perform the steps of:

Art Unit: 3625

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 39-45 and 47-53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pallakoff (U.S. Patent No. 6,269,343) in view of Ross (U.S. Patent No. 6,629,135).

Referring to claim 39. Pallakoff discloses a computer-implemented method for providing information from a seller about an on-line group buying sale to a website for referring potential buyers to the on-line group buying sale, the method comprising:

receiving item data from each of the plurality of sellers that defines a featured item for an on-line group-buying sale, wherein each seller transmits the item data over an electronic network to a computerized facility configured to conduct a plurality of on-line group-buying sales for the featured items defined by the received item data over the electronic network (Pallakoff: Fig. 3, "31...product description");

receiving sales data from each of the plurality of sellers that provides each sellers directions for the on-line group-buying sale of the featured item, wherein each seller transmits the sales data over the electronic network to the computerized facility (Pallakoff: Fig. 3, "31...different price levels for different demand thresholds");

storing the item data and the sales data received from each seller in a data repository, wherein the computerized facility uses received sales data to conduct the

Art Unit: 3625

plurality of on-line group-buying sales of featured items defined by received item data (Pallakoff: column 12, lines 54-67);

receiving instructions for selecting an on-line group buying sale from the plurality of on-line group buying sales for a website for referring potential buyers to an on-line group buying sale (Pallakoff: column 6, line 36 to column 7, line 5, "In the preferred embodiment, the system 13 presents one or more sellers' offers on one or more web sites with web pages similar to web page 21." and "... the system 13 presents offers on one or more web sites as in accordance with the program flow diagram shown in Fig. 5.");

receiving from the referring website a request for informational (Pallakoff: column 9, lines 34-65);

responsive to the request for information and the instructions for selecting an online group buying sale, selecting for the referring website an on-line group buying sale from the plurality of on-line group buying sales (Pallakoff: column 9, lines 34-65);

generating a display associated with the selected on-line group buying sales (Pallakoff: column 9, lines 34-65);

generating a link to the display (Pallakoff: Fig. 6); and

providing a link to the referring website, whereby a potential buyer accessing the referring website can access the link, and thereby access the display associated with the selected on-line group buying sale and participate in the selected on-line group buying sale (Pallakoff: Fig. 6).

Art Unit: 3625

The Examiner notes, Pallakoff discloses receiving from the referring website a request for information. However, Pallakoff is silent to a method wherein a request for information comprises a tag.

Allsop is directed to a method of providing dealer authorization information to a remote processing system. Allsop further discloses the use of tags (Allsop: column 5, lines 23-37).

At the time of invention, it would have been obvious to one of ordinary skill in the art, to have modified the method of Pallakoff with the teachings of Allsop in order to provide owners of a referring web site a cost effective and scalable architecture that streamlines content addition (Ross: column 3, lines 32-45).

Referring to claim 40. Pallakoff further discloses a method wherein the request for information from the referring website contains a sales criterion, and selecting for the referring website an on-line group buying sale is performed responsive to the sales criterion (Pallakoff: Fig. 4).

Referring to claim 41. Pallakoff further discloses a method wherein the sales criterion comprises at least a timing criterion (Pallakoff: Fig. 4, "46").

Referring to claim 42. Pallakoff further discloses a method wherein the selected on-line group buying sale is offered exclusively to potential buyers who access the

Art Unit: 3625

selected on-line group buying sale through the link provided to the referring website (Pallakoff: column 9, lines 34-65).

Referring to claim 43. Pallakoff further discloses a method comprising receiving instructions for displaying an on-line group buying sale from the referring website, and wherein generating a display is performed responsive to the instructions for displaying (Pallakoff: Fig. 5).

Referring to claim 44. Pallakoff further discloses a method wherein the instructions for displaying specify displaying the selected on-line group-buying sale in a random scheme (Pallakoff: Fig. 5).

Referring to claim 45. Pallakoff further discloses a method wherein the display comprises a link back to the referring website (Pallakoff: Fig. 6)

Referring to claims 47-53. Claims 47-54 are rejected under the same rationale as set forth above in claims 39-46.

Art Unit: 3625

Response to Arguments

Applicant's arguments with respect to the pending claims have been considered but are most in view of the new ground(s) of rejection.

Art Unit: 3625

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew S. Gart whose telephone number is 571-272-3955. The examiner can normally be reached on M-F, 9-6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeff Smith can be reached on 571-272-6763. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
